

Make your game

2 players / Rotate and route

1. Print single-sided on US Letter at actual size (100%). Measure the calibration line below. Use opaque paper or cardstock.
2. Keep the board page intact. Cut tokens along dashed edges. Optional: glue to thin card before cutting.
3. Cut the separate gutter tiles. Place each on its numbered cell with the arrow pointing as shown. Set Water and Lock beside the board.
4. Place components using the starting-position diagram. Read the quick reference and rules. Play one practice round, then reset scores and pieces.

1 inch / 25.4 mm

You need: scissors, optional glue/cardstock, pencil and paper for scores and turns.

The 3D landmarks become flat labeled tokens. No 3D printer required. Keep all tokens visible: color is reinforced by names and boat numbers.

Board & starting positions

North is the top of this page. Directions do not depend on where you sit.

NORTH / Green garden

1 / Northwest gutter 	2 / North gutter 	3 / Northeast gutter 
4 / West gutter 	5 / Center rain inlet  INLET	6 / East gutter 
7 / Southwest gutter 	8 / South gutter 	9 / Southeast gutter 

SOUTH / Amber garden

Grid positions keep their numbers. Rotate tiles in place; the inlet remains at position 5.

Separate gutter tiles

Cut dashed outlines. Each 1.7-inch tile fits within its 2-inch board cell.

Tokens & landmarks

Cut dashed outlines. Names and numbers also work in grayscale.

Quick reference

Keep this page beside the table.

1. Choose an unlocked gutter.
2. Rotate exactly 90 degrees left or right. Move Lock onto this tile.
3. Trace Water from the inlet. Stop at any exit or repeated tile.
4. North exit: first garden +1. South exit: second garden +1. Side or loop: zero.
5. Count this turn. After 12 turns, higher points wins. Equal points share victory.

Example sequence

After your first game: swap seats. Record total time, unclear instructions and repetitive choices. Computer diagnostics cannot establish whether the game is fun.

Rules manual

Setup

Two players: Green garden and Amber garden. Arrange the 9 separately cut gutter tiles in the 3 x 3 grid shown on the board. The first garden is north; the second is south. Directions stay fixed regardless of seating. Initial arrows, row by row: N N N / W E E / S S S. The inlet is gutter 5. Set the water and lock markers beside the board. On paper, use a pencil and paper for scores and turn tallies. Start both scores at zero; Green garden goes first.

Turns

Alternate turns. Rotate exactly one unlocked gutter 90° left or right, then place the lock marker on it. The previously locked tile becomes available. Follow one drop from the inlet through each arrow. All sides accept entry; only the outgoing arrow matters. Stop on leaving the grid or revisiting a tile. The lock never blocks water. Return the water marker to the inlet after tracing. Record one completed turn. No half-turns or passes. Example: if the inlet arrow leads to a north-facing gutter that exits the top edge, Green garden scores one, even on the other player's turn.

Scoring

Any north exit scores 1 for Green garden; any south exit scores 1 for Amber garden. Side exits and loops score zero. Scores depend on the destination, not who released the drop.

Victory

Finish after exactly 12 turns (6 per player). Higher score wins; equal scores are a shared victory. No overtime. Swap first player for a rematch. The digital game enforces these same actions and ending conditions.
